Help Us Help Others

CAP needs a steady supply of newer, quality hardware, software & peripherals. We can't fix monitors or printers so please recycle those elsewhere. If you have doubts, please contact us before bringing down very old items to donate.

CAP volunteers wipe/over-write all systems to DoD specification so you can be assured that your data is non-recoverable when you donate.

As a 501(c)3 non-profit, your donation is tax deductible. Please check with your accounting professional for details.

We always need volunteers to help in our mission. We also need funds to buy supplies, tools, pay utilities, etc.

Please contact us if you think you can help.

Computers Assisting People Inc.

Working to Bridge the Digital Divide in Cleveland since 1997

Computers Assisting People Inc. is a 501(c)3 non-profit organization made up of technically skilled volunteers who bring the empowerment of computers and technology to Cleveland non-profits.

Mission Statement

The information technology age has divided the world into two separate classes – the technology "haves" and "have-nots". Information is power and computer technology is the means to acquiring that information and hence, that power. Employment opportunities and even everyday life are becoming increasingly dependent on computer technology.

The mission of CAP Inc. is to reach those elements of society that may not have the opportunity to benefit from the technology that many of us take for granted. The Digital Divide is real – and growing.

We focus on seniors, kids, schools, churches, shelters, shut-ins, the disabled, released felons, returning vets and similar groups that help dramatically improve the quality of people's lives using technology.

CAP volunteers take in donated computers and peripherals and refurbish them before loading legal software and donating them to non-profits in the Cleveland area.

- CAP volunteers have refurbished well over 15,000 PCs and countless printers, scanners, routers, etc. and donated them to over 450 Cleveland area non-profit organizations and schools to help them with their missions and to bridge the Digital Divide in our community.

- CAP volunteers have spent thousands of hours assisting Clevelanders with their technology needs so that their organizations, and the people they serve, can benefit from the power of technology.

- CAP volunteers have also helped set up dozens of computer labs in underserved communities in every ward of the City.

- CAP volunteers have assisted with special hardware and software needs, provided network cabling and served as the IT department for numerous local non-profits.

- CAP serves as a place where people from the non-profits (as well as students and any other member of the community) can come and learn how to build, troubleshoot and repair PCs as well as gain other computer knowledge.

CAP's Resource Center is located on the 3rd floor of 2800 Euclid Ave. (Suite 314). Though we have regular work sessions every Monday and Thursday from about 1-6PM (and several Saturdays and other dates) we are volunteers so we recommend that you call before coming down to make sure we are there – especially on bad weather days.

The direct line to the Resource Center is (216) 928-1913. For normal CAP business please call our office at (216) 781-1757 and choose Option 2.
